

## Who can Join

All Business Networking Clubs (known as BNI chapters) have a strict policy of allowing only one person per profession to join. This offers great advantage to members as no-one around the table is in business competition with anyone else.

Effectively, this means that if a member of your network group hears of someone who needs your product or service - you will get a referral!

Additionally, by joining you are locking out your competition from the opportunity of becoming a network member.

We are currently seeking members to join our business networking club from the following industry or professions. The list is by no means exhaustive, so if you do not fall into any of these categories, please get in touch to see if your position is still available.

### Network member professions still available
